

Reflex Foam Mattress

British Vita (Vita Foam) is one of the worlds leading manufacturers of Memory Foam and Reflex Foam®.

Comfort Options

The mattress is 8" (20cm) thick and constructed of two layers of Reflex Foam®.

One layer is **Medium** and the other is **medium/firm**.

This gives you the choice of which surface you would prefer to sleep on for the best posture, support and comfort by simply turning the mattress.

- The Reflex Foam® Mattress uses Advanced Polymer Technology and contains negligible melamine giving outstanding performance, shape retention and long term durability.
- When the Reflex Foam® Mattress is used in combination with an electric adjustable bed the mattress will contour to follow the shape freely and precisely.
- There are no harmful chemicals used in the manufacturing process, which can be found in low cost imported mattresses.
- A 'Cool Feel' quilted zip off washable cover is included as part of the mattress. [Spare Washable Covers](#) are available.

The mattress can be reversed for your comfort
Either **Medium** or **Medium/Firm** as the top layer.

How it works

Whether the Reflex Foam® Mattress is used on an adjustable bed or not, it will give exceptional comfort by supporting the body in much the same way pocket springs work.

The advantage Reflex Foam® has over a pocket spring mattress is that it will retain its spring effect and support much longer than springs which tend to dip
