

Reflex Foam Mattresses

What is a Reflex Foam mattress?

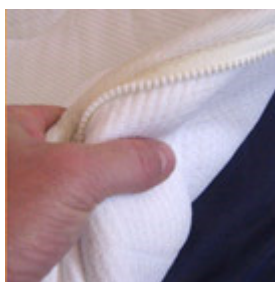

The Reflex Mattress uses Advanced Polymer Technology.

The mattress gives an outstanding level of performance, shape retention and long term durability.

When the position of the adjustable bed is contoured the mattress follows the shape freely and precisely.

Whatever position the adjustable bed is in the Reflex mattress will give exceptional comfort by gently cradling the body for excellent support.

British Vita (Vita Foam) are one of the worlds leading manufacturers of both Memory Foam and Reflex Foam®. We are guided by the expertise of British Vita (Vita Foam) in our mattress production.

A zip off washable top is included as part of the mattress.

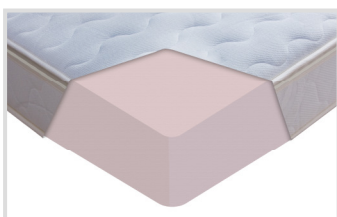

Spare Washable Tops are available.
