

Specials- For those with more specific needs or medical conditions

4 Motor System

Profiling & Lifting

4 Motor System

This adjustable bed has four motors which adjust independently to one another giving additional benefits for neck, back, upper thigh and lower thigh to suit certain specific medical conditions. The neck section can be adjusted independently of the back section. And the feet can also be raised and lowered independently of the upper thighs.

As a result of having two additional motors and completely different components, please add £350 to the standard price of the Serena Adjustable bed.

DESCRIPTION

- 5 part adjustable 4 motor system
 - Centrally mounted motors
 - Twin On-Line shoe fittings
 - Height adjuster fittings

 - Available width: 3'1" Width range: 2'7", 2'9", 3'1", 3'5"
- Lacquered wooden parts
 - Wood foil slats
 - Weight adjuster zone
 - Centre belt
 - All joints screwed
 - Standard length: 6'6"

Profiling and Lifting

This strong and robust system is the perfect solution for caring for the elderly or infirm. Bed lifting feature has a 4 part adjustable electric powered frame. The profiling and lifting bed is ideal for carers looking after those with relatively low mobility problems and where a more homely look is required. A twin bed option is possible if a risk assessment is carried out by the carer (speak to us for advice).

Due to the special features of this mechanism please add £650 to the price of the Serena Adjustable bed.

DESCRIPTION

- 5 part adjustable profiling with integral raise and lower facility
 - Available width: 3'1" Width range: 2'7", 2'9", 3'1", 3'5"
- Standard length: 6'6"

For those with more severe mobility problems, then see our range of nursing beds.
