

Pocket Spring Mattress

Pocket springs by Leggett & Platt - Foam by British Vita

Choice of **Medium**, **Medium / Firm** or **Memory Foam**
Top layer for your personal comfort level

Comfort Options

The mattress is 8" (20cm) thick and constructed of an individually pocketed spring core with a top layer, 2" (5cm) Reflex Foam® or high quality Memory foam.

Choose between **Medium - Medium/firm** or **Memory Foam**. Your choice should be based on your weight, any specific medical conditions and personal preference.

- The combination of high quality individually pocketed springs with your choice of foam comfort layer provides an excellent sleeping surface
- This is the best design for pocket sprung mattresses intended for use with adjustable beds.
- The design allows the foam encapsulated spring unit to contour to the shape of an electric adjustable bed.
- As a rough guide the option of **medium** would suit somebody up to 16 stone (102kg) and **medium / firm** for those above. For even better pressure relief we recommend the top layer of **Memory Foam**. We can give advice as there are other contributing factors.
- A 'Cool Feel' quilted zip off washable cover is included as part of the mattress. [Spare Washable Covers](#) are available.
- Comes with a five year guarantee.

How it works

Specifically designed for adjustable beds. Individually pocketed springs form the core which is encapsulated in foam. The comfort top layer of Reflex foam or memory foam will disperse your weight evenly over the sprung core. The pocket springs maintain your correct posture and the foam comfort layer provides the superb comfort.
